

Dear FCC - Please reject the NAB's petition 04-160. XM Satellite Radio needs to have it's first amendment rights protected. It is UNAMERICAN to try and stifle a competitor. Americans have the right to listen to or watch what they wish to when they are PAYING FOR IT!

I do get my traffic and weather from XM satellite radio, it is convenient and percise. I also listen to FM radio but prefer XM radio's format much better. More choices, less commercials, balanced news choices, and actually interesting music!

AM/FM radio should follow a similar format if they would like more Americans to listen to and enjoy AM/FM radio.

Sincerely,

Maria Lama, consumer, XM Satellite radio subscriber, mom, wife, teacher,
American
